

Conclusion

Sadly, the resulting woes from abortion and embryo experiments fall most immediately and heavily on the poor and minorities and especially women. Although black women constitute only 6% of the population, they comprise 36% of the abortion industry's clientele. The leading abortion providers (including Planned Parenthood, the national abortion chain which kills over a quarter of a million children by abortion annually) have chosen to exploit blacks by locating 94% of their abortuaries in urban neighborhoods with high black populations. This high rate of abortion has decimated the black family and destroyed black neighborhoods to the detriment of society at large. An Obama Nation would try to make these conditions permanent.

Minority women, too, are victimized by the promotion of embryonic stem cell research. The process of cloning human embryos for research requires a huge number of female eggs. There is a certain amount of inconvenience, pain and substantial health risk associated with the process for harvesting eggs. For this reason, it is likely that only women driven by need (typically the poor, including ethnic minority women, students, and women from developing countries) would donate the eggs needed for experimentation. While the United States still has no federal law prohibiting cloning, other nations including Canada, France, Germany, Norway and Australia, have made human cloning for any purpose a serious crime. Additionally, in 2005 the U.N. General Assembly passed the U.N. Declaration on Human Cloning which calls on all nations to prohibit all forms of human cloning. An Obama Nation, however, would multiply the exploitation and suffering of minority women.

Ultimately, we all suffer, as Lincoln observed in his Second Inaugural Address, lamenting the consequences of another abomination, slavery, upon our nation, north and south alike: "Woe unto the world because of offenses; for it must needs be that offenses come, but woe to that man by whom the offense cometh."

OBAMA NATION

"We should hire three or four colored ministers, preferably with social-service backgrounds, and with engaging personalities. The most successful educational approach to the Negro is through a religious appeal. We don't want the word to go out that we want to exterminate the Negro population and the minister is the man who can straighten out that idea if it ever occurs to any of their more rebellious members."

– Margaret Sanger, Founder of Planned Parenthood

Clone Wars

Above is the completion of the outlawed grisly abortion procedure that Senator Obama wanted the Supreme Court to allow, contrary to the will, compassion and wisdom of the people.

In the Illinois senate, Obama also voted to allow infanticide of babies fully delivered following botched abortion attempts. Before the senator from Planned Parenthood went to Washington, Congress outlawed this barbarity. The vote in the US Senate was unanimous!

“On July 17, 2007, Senator Barack Obama stood before Planned Parenthood and vowed that his first priority as president would be to sign the Freedom of Choice Act (FOCA). If enacted, FOCA would obliterate hundreds of state laws that protect women, parents, children, and health care workers, while forcing taxpayers to foot the bill for millions of abortions. It would overturn commonsense laws like parental notification, conscience protections, abortion waiting periods, informed consent, and regulations for women's health.”

Tony Perkins, President, Family Research Council,
LifeNews.com, July 17, 2008

On December 13, 1997, Obama, then a lecturer at the University of Chicago Law School, required the students of his Constitutional Law class to tell what they would advise ‘Mary and Joseph’ from ‘Bethlehem City’ about whether they could strike down a democratically enacted law to clone their 23 year old daughter who was disabled and in a ‘persistent vegetative state.’ After implanting the clone in Mary’s uterus, the couple planned to kill their disabled daughter.

Obama’s insensitive appropriation of the names of Jesus’s parents and his coercive requirement that his students participate in this morally repulsive exercise (under the time pressure of a final exam question for half of their course grade) are enough to question his judgment and leadership. His analysis of what he expected his students to answer, however, is truly frightening for those living in Obama Nation. Naming Supreme Court precedents beginning with Roe v. Wade, Obama concluded that if the Supreme Court follows his analysis, human cloning could be achieved against the will of the people.

Just over 2 years later, Obama was the lone senator in the Illinois senate to vote for human cloning. Later, unlike all of his fellow senators, he claimed that he had ‘pressed the wrong button.’ In subsequent state and federal votes, however, Obama continued to press the wrong button by voting for related legislation for embryonic stem cell research and ‘therapeutic cloning’ which also kill tiny human beings for experimentation and have failed to yield any therapies, treatments or successes of any kind. At the same time, he voted against increased funding for non-killing adult stem cell research which has already saved lives in at least 73 different kinds of therapies.

A war criminal was the term applied 60 years ago to leaders who brought people together for experimentation and killing. An Obama Nation is where such a person becomes president.
